German (B2)

SUMMARY

Experienced FrontEnd Engineer that loves building mobile and desktop web applications. **ReactJS** enthusiast, but also hands-on experience with **Angular (5↑), React Native** and **ElectronJS**. Listen to my podcast "La Hora Developer" to know how I work and communicate:
https://go.ivoox.com/sq/1924655

EXPERIENCE

Kepler Cheuvreux | LEAD FRONTEND ENGINEER

Apr 2024 – *present* | Madrid, Spain

- **Led the Front End Team** with **hands-on development**.
- Developed **Desktop apps** with **ReactJS**, **TypeScript** and **ElectronJS**.
- **Cypress** testing + **Zustand** state management.

Mercedes-Benz | LEAD FRONTEND ENGINEER

Oct 2019 – Apr 2024 | Madrid, Spain

- **Led the Front End Team** by coordinating the work of 8 engineers in simultaneous projects, while having **hands-on development**.
- Designed, built and launch web applications based on JavaScript, using **React**, **React Hooks**, **Redux**, **Context API** and design systems like **Material UI**.
- Guided and **mentored junior developers** by having code reviews, one to one meetings and pair programming.

Indra (Minsait) | FRONTEND ENGINEER

Jan 2017 – Oct 2019 | Madrid, Spain

- Developed web applications based on JavaScript (**BackboneJS**) for BBVA Bank.
- Reduced browser's CPU usage from 94% to 6% in Pull & Bear's (Inditex) web application by changing the animations from JavaScript to CSS.
- Designed FE architecture and created reusable component libraries in **Angular** for Bankinter and Santalucia's web applications.
- Unit testing: **Mocha** + **TapeJS.** E2E: **Selenium** and **Cucumber**.

Aslam New IT | MOBILE & FRONTEND DEVELOPER

Mar 2015 – Dec 2016 | Madrid, Spain

- Built and launch mobile and web applications based on JavaScript, using Apache **Cordova (Phonegap)**, **BackboneJS** and **Marionette**.
- Developed the mobile app for Citroën and Peugeot dealers in Spain, France and the Netherlands.

Krama e-soft | FULLSTACK DEVELOPER

Apr 2014 – Mar 2015 | Madrid, Spain

- Built and launch mobile and web applications based on JavaScript, using Apache **Cordova (Phonegap)**, **IBM MobileFirst (Worklight)** and **Android**.
- Developed back-end code in **Java**, **JSP** and **Struts**.
